CD – MP3
Aux Input from Rear

Power Supply:
11 to 15V DC

Power Output:
40W x 4

With stereos still a popular choice for many smaller and larger boats, the CDC9000MP3 is designed with a few extra features. This unit has built in AM/FM radio with the capacity to play CD and MP3 on CD-R or CD-RW discs. This unit also has a rear mounted Aux input for those wanting to connect Ipod, video cameras, or other devices to have the sound come out through all your stereo speakers.

The output power of 4x40W is impressive, simple and clear controls allows you make easy changes without trying to work out fancy control panels. Removable front face provides that extra security if you are leaving your boat or caravan for any extended period of time.

When it comes to the best technology, Majestic is leading the way.
