Unlimited (no cable wrap)

Temp Range:
-22 Degrees to 55 Degrees

Power:
12V DC @ 4A (max)

When it comes to the ultimate Satellite antenna systems you cannot go past the SATMAR60. With a built in GPS which provides acquisition time to be significantly faster than most other brands. The SATMAR60 is a large antenna for the larger offshore cruiser that needs to be fully up to date with football, news or whatever they want to watch through either a SKY Decoder or Free to Air Decoder.

The SATMAR60 has all the technology that is used in the SATMAR37 and SATMAR45, with the extra benefit of the GPS and capabilities of being totally Trans Tasman. Wanting to go to Australia, no need to change anything, just set sail and let the Majestic system do its job – enjoy yourself.

When it comes to the best technology, Majestic is leading the way.
