UFO

Gain:
28dB

Noise:
<2.5dB

Range:
45 – 860MHz (FM-VHF-UHF)

Impedance:
75 Ohms

Power Consumption:
50mA

Size:
250mm Diameter x 100mm Height

Reception:
360 degrees

Amplifier:
Located in Antenna for less Noise

The Majestic UFO has proved to be one the best omni-directional TV antennas on the market. With Global sales into thousands of units per year, “performance” is the keyword when you mention Majestic.

The 28dB High Gain amplifier in the UFO gives you the best possibility to amplify the TV signal before all the interference is picked up in the cable system. Once boosted, the signal is sent down the TV cable at such a high level the interfering noise is insignificant.

Designed to withstand the harsh ocean environment, whilst looking very stylish with it's state of the art appearance, the UFO is the Ultimate TV antenna.

When it comes to the best technology, Majestic is leading the way.
